Education

University of California, Riverside

Riverside, CA

B.S. in Computer Science (GPA: 3.80)

September 2023 – June 2027

Experience

Suncreer Inc.

June 2026 – August 2026

Software Engineering Intern

Tokyo, Japan

- Built a full-stack prototype using **Python**, **Next.js**, and **Claude Vision** that converts documents submitted by client companies into an **HTML** layout, then populates it with matching data from Suncreer's own database
- Achieved 99% field-matching accuracy across 10+ test documents by integrating **Claude API** with **MS SQL Server** and **MySQL** to map extracted fields to the correct database columns
- Built a real-time editing dashboard in **React** and **TypeScript**, exporting finalized data as Excel reports

Handshake

May 2026 – August 2026

Software Engineering Fellow

Remote

- Developed and evaluated prompts to assess the performance of **LLMs** in software by documenting 10+ comparative reports, benchmarking coding agents across 30+ trajectories in **Docker**-based environments using **OpenCode**
- Contributed to improving AI understanding of complex software through expert code review and feedback by assessing code correctness, agentic behavior, communication, and code quality across agent-generated implementations

Association for Computing Machinery

March 2025 – April 2026

Software Engineering Lead

Riverside, CA

- Led and taught 4 teams of 10+ developers in web development using **React**, **TypeScript**, **Next.js**, and **Tailwind CSS**, serving as Scrum Master to facilitate sprint planning, code reviews, and Agile development
- Automated **CI/CD** workflows with **GitHub Actions** to enforce unit testing standards across 200+ pull requests
- Directed 4 **Figma** design projects, collaborating with on-campus organizations of 2,000+ members

Citrus Hack

December 2025 – June 2026

Software Engineering Lead

Riverside, CA

- Directed development for the Citrus Hack website, UC Riverside's premier hackathon platform for 300+ participants
- Collaborated with UI/UX designers to develop responsive pages using **Next.js**, **TypeScript**, and **Tailwind CSS**
- Led a team of 6 developers, directing sprint planning and code reviews to ensure on-time deployment

Projects

Mahoroba Japanese Bakery

🎧 [mahoroba-japanese-bakery](#)

Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Prisma, Stripe, Docker

- Deployed a full-stack e-commerce ordering platform using **Next.js**, **React**, and **TypeScript**, implementing **RESTful API** endpoints to handle dynamic product catalog filtering and multi-step Stripe payment workflows
- Engineered a robust **CRUD** data layer using **Prisma** ORM and **PostgreSQL** to manage end-to-end entity lifecycles for products, customer profiles, and orders with automated data validation and type-safe schema modeling
- Designed resilient client/server state management & RBAC using **Zustand**, **TanStack React Query**, and **NextAuth.js** (**Google OAuth**), featuring offline-persisted shopping carts

Student Organization Websites

🎧 [student-organization-websites](#)

Next.js, TypeScript, Tailwind CSS

- Built responsive web applications for 5 student organizations ([CSA](#), [PTSO](#), [AISC](#), [Mock Trial](#), and [Redefined](#)) using **Next.js**, **TypeScript**, and **Tailwind CSS**, delivering interactive platforms with custom theme styling
- Integrated **Google Calendar REST API** using **TanStack React Query** for asynchronous data fetching and embedded live social feeds using **Instagram REST/Widget APIs**
- Configured automated **CI/CD** deployment pipelines via **GitHub Actions** for error free, zero-downtime deployment

Technical Skills

Languages: Python, TypeScript, C++

Libraries: React, React Query, Prisma, NextAuth, Stripe API, Claude API, Google OAuth

Frameworks: Next.js, Tailwind CSS

Developer Tools: Docker, PostgreSQL, Supabase, Git, GitHub Actions, Vercel, OpenCode, Figma, ESLint, Prettier
